

STAN ROBOTIX 6622

Collège Stanislas de Montréal
Équipe de robotique

Sponsorship package 2025-2026

Stan Robotix 6622 is a **student initiative** created in 2016 and formed by around forty students **aged 14 to 18**, whose goal is to develop and put into action a variety of skills in the field of robotics.

Your sponsorship helps shape our future!

TEAM SPIRIT, LEARNING, AND INNOVATION

Since the team was created, students have been completely independent in organizing their work sessions and robot construction. When needed, they receive help from mentors, who may be professionals or former students.

The strength and determination of our team are unwavering, and your support is invaluable: **join us and let's build the future generation together.**

TEAM BUDGET

We build and program robots to put our learning into practice and participate in robot competitions: we need equipment (tools, materials) and financial support to cover competition-related expenses.

OPERATING COSTS:

Kits and materials:	\$8,000	
Tools and workshop maintenance:	\$4,500	
Electronics:	\$3,000	TOTAL: \$20,000
Communication and promotion :	\$2,500	
Logistics:	\$2,000	

COMPETITIONS :

REGIONAL COMPETITION IN QUEBEC

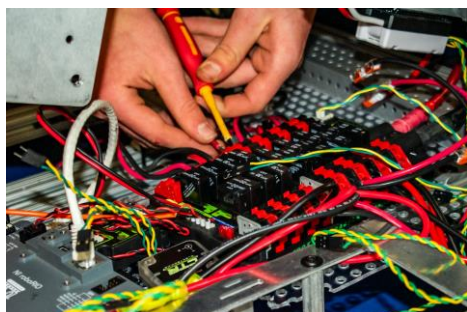

Registration fees:	\$8,900
Transportation:	\$3,000
Accommodation :	\$5,000
Merchandise:	\$2,500
TOTAL:	\$19,400

OTHER REGIONAL COMPETITION IN NORTH AMERICA:

Registration fee:	\$4,000
Transportation:	\$3,000
Accommodation :	\$9,500
TOTAL:	\$16,500

COMPETITIONS IN HOUSTON (TEXAS) IF SELECTED FOR FINAL:

Registration fee:	\$8,000
Transportation:	\$10,000
Accommodation:	\$6,000
TOTAL:	\$24,000

TEAM PROFILE

There are around 40 of us students, and we operate like a real small start-up. Each department has a leader responsible for organizing learning activities and workshops, and ensuring that collaboration within their group, as well as with other departments, remains smooth and effective.

Girls represent more than 50% of leadership.

Stan Robotix is a true inspiration for encouraging girls to take an interest in STEM.

More than just robots!

To ensure the team runs smoothly, students are divided into skill groups: from building our robots to programming them, managing the team and brand image, among other things, we develop a wide range of skills.

WHAT HAS BECOME OF THE FORMER MEMBERS OF STAN ROBOTIX?

More than 80% of former members pursue studies in STEM.

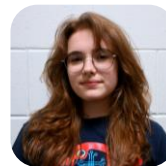

Alumni often return to the team to share their knowledge and lend a hand to new recruits.

Over 90% of our former members say that this experience played a crucial role in their career choices.

The club has inspired dozens of young people with a passion for robotics. Supporting our team helps ensure the continuity of this initiative and encourages innovation.

Stan Robotix congratulates Stéphanie, its captain for 2024-2025, on continuing her academic journey by enrolling at Harvard University.

TEAM LEADERS 2025–2026

Nina
Captain

Thimotée
Co-Captain
Head of Programming

Katherine
Head of Security

Maya
Head of Media
Marketing

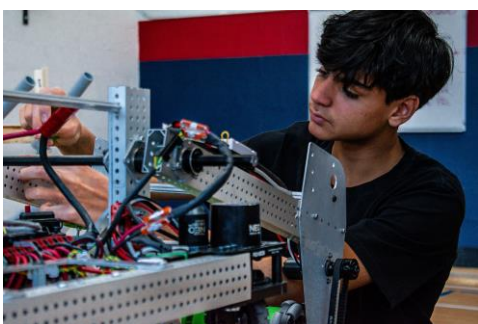

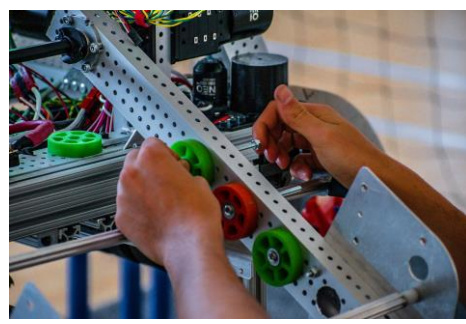

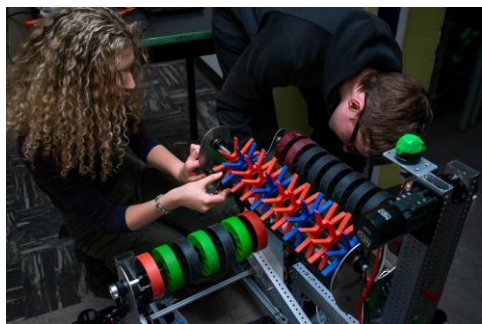

Alban
Head of Construction

WHAT WE DO

SEMESTER 1: LEARNING AND DEVELOPING SKILLS

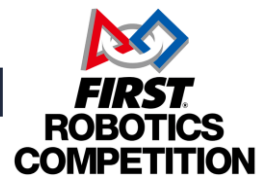

During the first semester, the skill groups are organized and **mentors help students apply what they have learned in school and develop new skills:** coding, using tools, website maintenance, administrative management, external communication, representing the club within the school, etc. Everyone finds their place and helps prepare the team for phase 2.

SEMESTER 2: ACTIVATION AND COMPETITION

It is in the second semester that all the preparation carried out since the beginning of the year delivers the value that has been developed: **the talent of each student, the strength of teamwork, endurance in effort, and tenacity in the face of the challenges of building a robot are put into action.** The team designs and manufactures a robot that will compete in an international competition: First Robotic Competition.

OVERVIEW OF THE **FIRST** PROGRAM

FIRST is the youth organization behind the world's most prestigious international robotics competition. By sponsoring a team, sponsors encourage excellence and innovation.

3.2 million students
since 1989

First Robotics Competition is the highest level of competition offered by FIRST.

High school students are teaming up with leading technology companies to build high-performance robots. This is the best way for students to familiarize themselves with the world of engineering.

The competition attracts teams from around the world, offering sponsors international visibility and the opportunity to be associated with a global movement in STEM education.

196
countries

participating
since 2017

3500
teams

participating in the
FIRST Robotics
Competition 2024

93%

young people more inspired to serve
their communities in 2023

This competition combines the excitement of sport with the rigors of science and technology.

Built from scratch, the robots measure 1.5 meters tall and compete in high-performance “robo-sports” competitions. **The best of these robots compete in First Robotic Competition tournaments.**

HOW CAN YOU **HELP US?**

You can make a donation by direct deposit to the following address :
[Fondation du Collège Stanislas - Don en ligne - Stan Robotix](#)

Your financial contribution will be made through the College Foundation, which is a registered charity and will allow you to receive **tax receipts** for these amounts

You can also support the team by offering:

- Mentoring and knowledge sharing
- Donations of materials
- Loans of equipment or premises
- An opportunity to visit your company to inspire students
